Abstract
Trends of Phonetical, Phological and garammatical for Ibn-
Mohaisen reading

Tahseen Ibrahim Albtoush

Mu'tah University, 2008

This study dealt with the phonetic, morpho-Logical, and grammatical aspects in Ibin Mohaisen recitation. In the introduction, I came across the biographical side of Ibin Mohaisen of Mecca including his masters and students. Chapter I was about phonetic homology, diphthongization, Lessening of nouns and verbs, emphasis, phonetic apposition, and other related areas of concern.

The second chapter dealt with the morpho-Logical aspects in Ibin Mohaisen recitation, specifically nouns singular and broken plural, three Letters verbs and over, the derivation, the verbal forms of past, present, and imperative tenses.

Syntax was the main issue in chapter three especially ellipsis in nouns and verbs, subject and predicate, revocatories, and other related matters.
